Heart Chase Has Idea Of What World Means To Chicago Bears Chase economist, picture conditions and possibilities. The third and promising way is a system of overland control of key economic points. Under this last he sees a 30-hour work week bringing every family a minimum income of \$5.00 a year. He finds the financial system at fault for not having supported the engineering standard. Mr. Chase must be right because it is so different—his is an economist's view, not a layman's.
